Russia and China were always friendly since the 2000s, but this is unusual.

Perhaps Russia and China have both realized something that we don't see yet...

Well it wasn't surprising considering how ooga-booga retarded and agressive US behaves last decade.
Trump was a relatively ok guy, mind you, Biden and his neoliberal schizoids will probably provoke even deeper military cooperation.

Anonymous ID:o00Uw12I Thu 24 Dec 2020 02:32:14 No.298308481 Report

>>298308356
>, since the consequences of the dam's failure, should it occur, would be catastrophic. The resulting flood wave, which could be from 50 to 200 m high near the breach and moving at up to 200 km/h, would destroy the downstream Maynskaya HPP in a matter of minutes; the nearby town of Sayanogorsk would be flooded in under half an hour, and the heavily populated area including Abakan and Minusinsk (altogether more than 200,000 people)—within 40 minutes to several hours. After reaching the Krasnoyarskaya HPP further downstream, the flood wave would rise its reservoir by roughly 10 m and spill over its dam, destroying the power plant machinery. If that dam should fail too (the possibility of which exists in this scenario), the resulting mass of water could wash away the city of Krasnoyarsk and its suburbs, drowning or displacing their population of over 1,000,000.[28][30][31]
Hahahahha

I don't like what Russia stands for. It's a fucking sad slave factory, the word Slave literally comes from the people that inhabit it. Russia has been a series of warlords ruling over a bunch of fetal alcohol syndrome infected rape babies since nobody can put down their vodka for more than a second to think about what they're doing and why they're doing it without realizing the problem is their subhuman slavishness (hah). Everything Russians do manages to kill entire regions, cultures, economies horribly like with Chernobyl or communism or waging a basic war which they can't do without throwing hundreds of thousands of unarmed men into machine gun fire because they're too poor and dumb to do anything else.

You're right, in a nuclear war Russia will barely be distinguishable from its current state because your cities are already falling apart and your people look and act like raider mutants. Russia has been able to make nothing new for the past 40 years, all of it is basically just slapping a new coat of paint on Soviet era technology, architecture, jobs, propaganda, and pretending like you're not a European version of Africa. You manage to make everyone angry by simply existing because you can't even disassemble a submarine without causing a massive international environmental disaster from giving up 40% of the way and just ramming it into the bottom of the Barents sea. Your country regularly releases radiation over itself and Western Europe to the point where nobody trusts what your scientists say about what happened because they know there was an accident and you'll wait until 100s of people are dying from their skin falling off before admitting that soemthing isn't normal.

I'd call you Joe, but you are probably Jose or something.
Let's just make something very clear. It's your country who is spreading faggotry all around the world. It's your leadership drawn half of the planet in civil wars. It's your collective fault and to notice, it's not like you do anything about it. Other players are just defending from US rampant faggotry.
I can come to understandig with ordinary american citizen, it's not like we hate you or anything. But speaking in terms of nations, oh boy, you guys are litterally unbearable.
We do not try to shit up white america, in fact anything worth loving in US belongs to whites. But untill you unfuck your leadership we'll probably won't even listen to you, especially in comparison to China.

So the USA is basically run by a bunch of Jews and Anglo-Zionists who hate white majorities.
Whilst China is run by ethnocentric Han who seem willing to get along with predominantly white countries like Russia without trying to shatter their white racial demographic.
It seems like China is more on the side of whites than the USA is. Or UK or Western Europe, for that matter.

Holy shit, that is some prime pro-israel boomer rage.

Lets unpack that shit.

>Because Russia and China are so tough they are able to wipe a tiny country like Israel

Typical jewish overdramatization, trying to drum up support for an "endangered little country". They are not interested in that

>without fucking with their slave state first?

"Fucking means", they are breaking the international embargo lobbied by israel and its golem around Iran, allowing it to export its oil to China. They are also very interested in building infrastructure and shit over there as part of the One Belt program.

>No the obvious solution is to just blame the slaves

Could you blame Iranians for not keeling over to the israelis just because they kvetched really hard but went out and found allies? This is just typical jewish supremacism, amazed at the "gall" of goyim not obeying them in everything.

>that makes sense, fucking retarded communist faggots

Its been a while, that meme doesn't really work anymore, only on braindead boomers. Especially how there are more communists in america than anywhere else.

Its just that Chinese respect Russia, and we pay back the respect. Xi Jonping flew 8 times to Russia. Eight fucking times, more than he visited any other country. Shows how high Russian relations are on the priority list for China.

https://en.wikipedia.org/wiki/List_of_international_trips_made_by_Xi_Jinping

And for example, Trump never came to Russia. One time he went to Finland to talk to Putin, but nothing came out of it. If we would compare how often Xi and Putin met in other countries, the number would be even more embarassing to Trump.

And this type of foreign leaders visits is a good indicator. You can see what people put on the priority list. If some leader never bothers to visit some part of the world, it means they are not intrested in this place. Trump also never visited Africa.

But you can fucking bet this kike cock sucker gone to Israel.

Russia and China also view each other as allies and friends. 71% of Russians view China favorably and 41% view it as a friend.

Russia is the only potential ally China needs to guarantee itself stable energy and food imports, a trading route to Europe, a trade partner outside the petrodollar system, very powerful military help and a huge and sophisticated nuclear arsenal to back them up. Neither China nor Russia can ever be isolated as long as they have each other.

Whatever, they're still a bunch of LARPING faggots. They aren't even close to being a match for NATO. Yeah, yeah, Russian can bully Ukraine and Georgia. Yeah, yeah, we met let them take the Baltic states, who cares. But imagine Russia trying to invade Germany. Russia would have trouble just taking on the combined European forces and American troops currently stationed in Europe. If America actually sent over any resources, Russia couldn't do shit.

And China? Sure, we might let them take Taiwan, but that's about all they could do. Imagine China and NK trying to take SK. Just the pacific fleets and Japan's and SK's forces alone would be a match for China's entire military, let alone the other 9 carrier battle groups and the rest of the US navy.

The Chinese have definitely stepped up their game. Military action in their sphere of influence today would be a lot more costly for America than 20 years ago. The Russians have also invested in their special forces and can also influence their immediate region. Neither of them could threaten any major country, though.

This. Amerimutts are just fucking retarded when it comes to geopolitics. The world fell into their lap in 1991 and thought rather than putting effort into maintaining the situation it was their god-given right. Imagine what could have happened that instead of trying to continuously antagonize Russia and causing the rise of Putin, they decided to enact a second Marshall Plan to the ex-communist countries, fueling a huge, global economic boom as all those countries would be able to afford western products. Hell, East Europe, Russia and Middle Asia could be the global centers of production now, rather than China, or at the very least they would be strong, west-aligned regional powers.

But no, mutts drove them together WHILE doing shitty desert adventures funded by China(thats where they got their dollar stocks) and giving crucial decades of uninterrupted growth to them. Even now, they are not doing anything major or meaningful to counter them. No major moves, no alliance planned, no global alternatives, just getting occupied by internal strife and more bullshit about Russia

>>298312383

Why would Russia lose even a single soldiers doing something so ridiculous? This isn't Ukraine or Belarus.

Russia's immediate interest are other East Slavs and continuation of the Russian people. Russians can literally receive over 23000 USD for having three children nowadays (17000 for two).

Russia and China have had close military relations since 1993, and have gradually started exercising together. Now it gives another political signal, along with using Ruble/Yuan for their Russo-Sino trade.
What do you expect them to do, with the jew USA still trying to push both in separate corner, eventually they're going to wise up.
What 'you don't see yet' is just you being addicted to jew propaganda, all puny 25 million of you. The US will sacrifice you as

they sacrifice all of their 'partners', meanwhile your entire economy is dependent on China. Good luck!

China?

How so?

Capitalists cry and demand access to China's market because it's large and lucrative. That's about it. Manufacturing can be done anywhere; it won't be as efficient at first, but if you give it time and effort it will be more efficient thanks to not having a power-hungry state in the way and stupid bugs working the machines.

The world you see today is the result of America winning the cold war, not Russia. Had Russia won, the entire world would be filled by mostly self reliant, old-school socialist states with homogenous, conservative populations at the minimum.

At its maximum, humanity would be going full speed ahead to post scarcity via digitalized command economy, mastered fusion (and built dozens of reactors for every state) and terraforming Mars.

For some reason, it's the Eastern European states that are homogenous and for some reason USSR tried to build up all of those states in Africa and the Middle East to be industrialized and self-sufficient (thereby, eliminating the need to move somewhere else), while the west destroyed them and then let in hundreds of millions of them to replace its population. It also supported everything to oppose USSR, even extreme Islam.

the cool thing about counter insurgency is that we leave the stuff there, so that we don't have to smuggle shit in 10 years later to teach people a lesson.

for some reason people don't get it, the american mic doesn't win because it is the most technologically advanced or because they have a large quantity of conscripts or because they have the most accurate disinformation from israel, they win because they take the principles of security seriously and because they are aggressive. sure they cannot protect against every single little thing, so instead they fucking rig bombs to every little thing, touch our shit and die. it's that simple, but whenever someone dies touching us they keep bragging about putting a finger on it.

they died making it happen, that's our point. the tomahawks are already in the region. same with 3GD

the funny thing to me is how you get the scale of operations wrong, like you make 5 to 8 boats and go nuts. carriers are cool, really, but the united states doesn't even make carriers. they make carrier fleets.

china isn't making AN ENTIRE ARMY to complement each boat they make, they get the scale of production all wrong. they only produce what is emotionally convenient for them, not what boats and areofoils are actually useful in force projection scenarios. you keep counting planes and boats instead of FLEETS.

No, it won't. Even Moscow is ~85% white and that's taking into account around 1.5 million temporary workers from central Asia. I pass through there regularly when I visit my relatives.

Russia also has +2 million Slavs after Crimea and +3 million Ukrainian citizens living in Russia since 2014.

You sound exactly like swedes used to sound 30 years ago. Its pure cope, your reasoning amounts to "its just a flesh wound, its fucking nothing". You completely disregard the fundamental mathematics of shrinking and growing populations and the long term trend. You are just as fucked as Sweden and America but you are still in the denial stage. All you want to do is to bleat "RUSSIAH STRONKH PRAISE STALIN WE WON WORLD WAR 2 HUH HUH HUH". In reality you live in a dilapidated semi shithole with ICBMs and jet fighters slowly turning into a full third world shithole with imported and home grown third world population majority. You russians would have been better off if Germany had won world war 2. If you seriously think the germans would have exterminated millions of fair haired and fair eyed slavs you are deluded.

I'm not going to read an entire article and I'm fully aware of the current demography of Russia. The nationality of people obtaining Russian citizenship is also out in the open.

What westerners often fail to realize is that the absolute majority of Russian Muslims live in the green areas of the map and all of them except the Chechens have a low TFR. Meanwhile, the central Asians in their majority rotate from Russia to their own countries. There is a very palpable lack of central Asian females in Moscow for this very reason, they are still back home giving birth to the people you see on this map >>298334567

The point is you haven't been paying attention to both what happened 6 years ago and what you posted. Your conclusions were based on a faulty premise from the very beginning.

>not important

Plotting to kill the petrodollar isn't important? This is THE most important thing to the US of all and Russia both shielded Iran (one of the primary nations in this plan, along with China) in Syria and is in the process of phasing out the dollar in its transactions.

Static ICBM and barely mobile all-terrain launchers are useless for deterrence: they are all mapped out and can be hit by hyper-sonic weapons before russian command would have time to react.

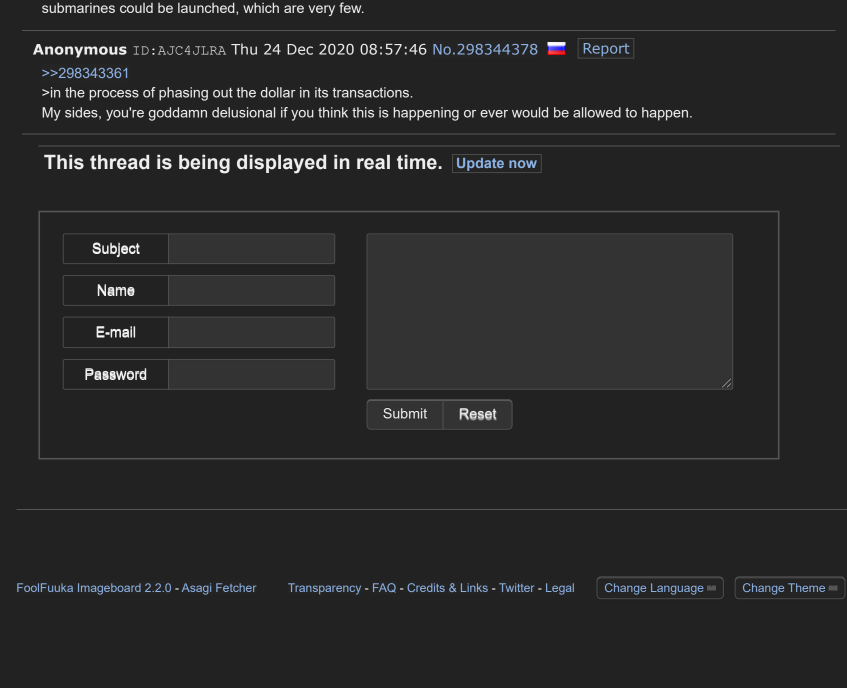
The only possible deterrance are submarines. Notice the proportion of nukes between land\sea is in largely in favor of sea in US (Toledo class etc.)

Look up our active ICBM-capable sumbarine fleet and how many Russia can maintain out in the oceans at any given time. Hint: it's only a couple.

Then look at the map and realize that Russia has no warmwater ports that has straight exits to the world oceans: Far East are surrounded by Japan (NATO), South-West choked by Turkey (NATO), North-West choked by Denmark (NATO). Those are all infested with listening posts and buoys and are impossible for russian submarines to traverse undetected.

There is no safe place for submarines to go on a strategic deployment in the oceans, with the exception of Far East, which is why Russia is so adamant on keeping Kuril islands, despite slow-boil conflict for it with Japan since 1945.

TL;DR: Our strategic potential is shit and out of total payload here >>298311598 only a fraction from combat-duty



submarines could be launched, which are very few.
